FLAGSTAFF UNIFIED SCHOOL DISTRICT CUTS WASTE WITH SUNGARD PUBLIC SECTOR'S BusinessPLUS DOCUMENTS ONLINE

SCHOOL DISTRICT PROFILE

- Public school district located in Flagstaff, Arizona
- Includes 20 schools:
 - 3 high schools
 - 4 middle schools
 - 9 elementary schools
 - 4 Magnet Schools
 - 2 Alternative School Programs
- More than 11,000 students

CHALLENGES

- Inefficiency of retrieving archival reports
- Paper waste

OBJECTIVES

- Make the data easier to access
- Reduce paper usage, cost

SOLUTION

- Documents Online allows reports to be produced, archived and retrieved electronically

BusinessPLUS APPLICATIONS

- Documents Online

BENEFITS

- Efficient report creation and retrieval
- Lowered paper cost
- Reduced environmental impact

“Just cutting down the amount of paper we use is good in terms of saving the district money, but also in terms of the environment.”

CHRIS GROVE
Director of Finance, Flagstaff Unified School District, AZ

Flagstaff Unified School District has leveraged the **BusinessPLUS** system to improve processes, and as a result has reduced its impact on the environment. The Documents Online functionality provides the District the opportunity to forgo the use of printed reports, instead outputting to electronic format for logical archiving and quick retrieval. Flagstaff realizes not only a financial benefit, but an environmental one.

“With each payroll run, we would generate about a foot and a half of paper that would be stored in a room, and then a year later it would get moved to a different room, and a year later it would get moved out to a remote facility, and at some point be destroyed. That’s all going away with Documents Online,” said Chris Grove, finance director for Flagstaff. “Just cutting down the amount of paper we use is good in terms of saving the district money, but also in terms of the environment. Besides saving paper and being sustainable, you have instant access instead of having to hunt through a stack of paper to find information.”
